

EE-6604.BWF.48L.40T

WHEEL ALIGNMENT SCISSOR

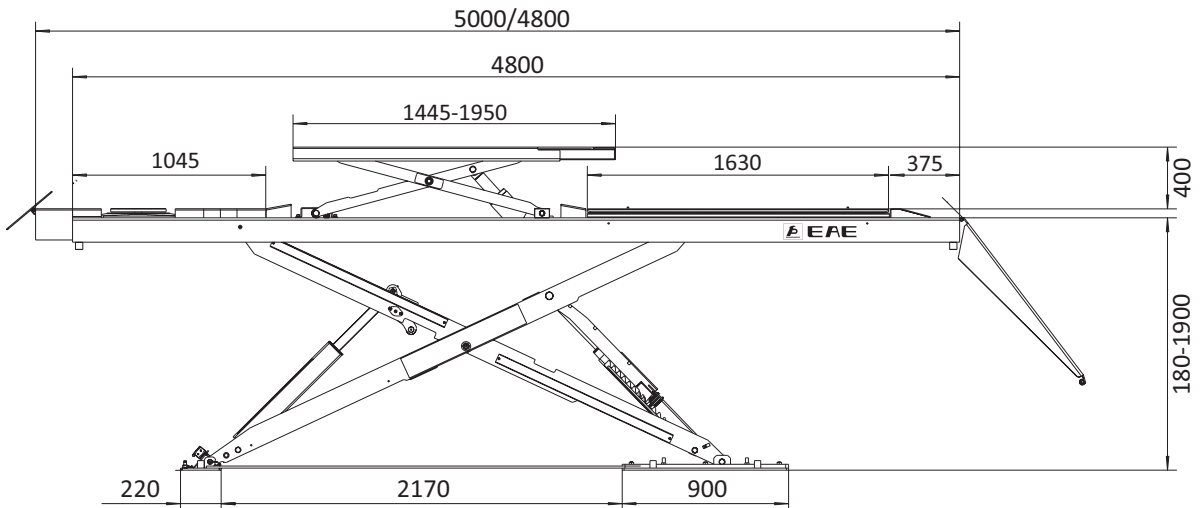

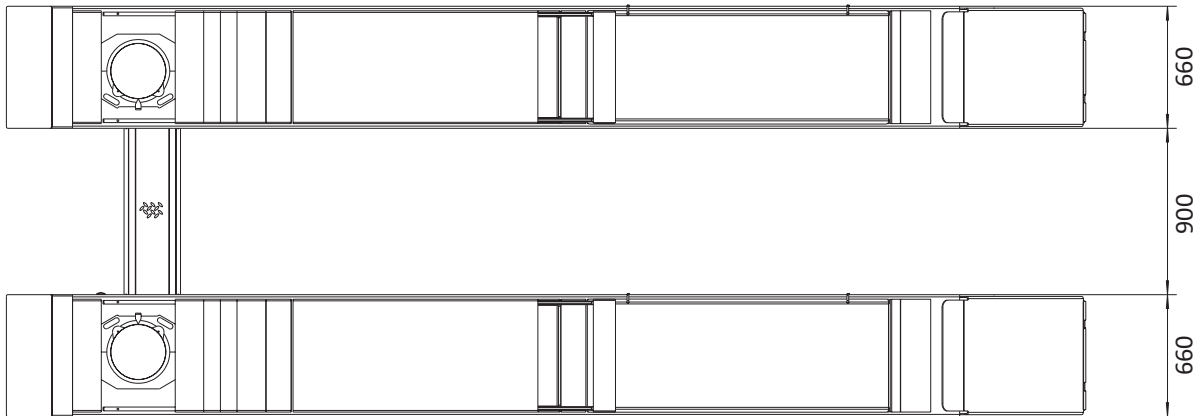

FEATURES	BENEFITS
» 4000 kg Safe working limit	Should be able to lift most passenger and light commercial vehicles
» Certified to Australian standards, Worksafe design registered	Mandatory in a commercial workshop environment (Tufflift provides on all products regardless of the environment)
» Maximum lifting height of 1.9 m	Suitable for taller technicians
» Scissor lift, low profile platforms	Ideal for workshops with limited space and easier vehicle access
» Surface mount	Easy installation & low cost
» Adjustable turntable positions, long slip plates	Suit more vehicle types
» In platform jacking beams	Lift all 4 wheels off the ground simply and quickly
» Aluminium power unit	Avoids over-heating, quiet operation and longer service life
» Electrical levelling	Easy adjustments if required
» No columns	Ideal for camera wheel alignment systems
» Self-lubricated bushing and bearing	No maintenance, long service life
» Can be flush mounted	Aesthetic, no trip hazard
» Durable powder coating	Looks fantastic in any environment
» Hydraulic oil supplied in the kit	Very convenient, no last minute running around trying to locate oil in small qty or after hours (DIY installers)
SAFETY	
» 24V controls with isolation switch	Maximum protection for the operator
» Mechanical safety lock	Scissor is securely locked while vehicle is elevated
» Pneumatic safety lock release	Compressor required, larger lifts have generally pneumatic safety lock release
» Anti-surge valve	Applies flow control hydraulic system, prevents rapid descent
» Safety descent alarm	Audible alarm to warn the operator when lowering the lift
WARRANTY	
» 5 years (structure) + 2 years (electrical & hydraulics) warranty	Other products only have 1 year, peace of mind
» Warranty	Parts and labour (excludes travel)
