

# geodyna® 7100

COMPACT AND ACCURATE,  
FOR LOW-VOLUME TYRE  
SHOPS

geodyna®  
WHEEL BALANCERS

The **geodyna® 7100** is a simple and cost-effective wheel balancer for low-volume tyre shops. It stands out for the small footprint, the imbalance minimisation and optimisation programmes, the VPM measurement technique and finally, for QuickBAL™, that cuts down the start-stop cycle to 6.5 seconds. Finally, it features easyALU™, a semi-automatic selection of balancing modes.

FEATURES	7100	7100m	7100n
Wheel guard	•	•	
Standard motorcycle adaptor		•	

## Compact cabinet

The **geodyna® 7100** features a small and ergonomic cabinet, making it ideal for low-volume tyre shops.

## 2D data entry

2D data entry consists of the support for semi-automatic data entry and positioning of adhesive weights thanks to the **geodyna® 7100's** gauge arm.
